SPRING 2022 NEW COLLECTION

STORMTECH®

nurtured by nature

For 45 years, STORMTECH has been meticulously designing and supplying quality outdoor apparel and accessories to companies throughout the globe. From tech giants of Silicon Valley to heritage auto companies of Detroit, STORMTECH has been the brand of choice for premium outdoor apparel. With design excellence and functionality that blends exclusive technologies, with innovative design and sustainable sourcing, STORMTECH has established a global reputation. Beyond product, STORMTECH donates 1% of global sales to charitable initiatives focused on outdoor exploration and environmental stewardship. We invite you to learn more at www.stormtechperformance.com.

Environment Stewardship

INTRODUCING PURE EARTH

We're on a mission to make clothing sustainable through product design, sourcing, and compliance. These new products represent another milestone on the road to sustainability with recycled fibers and BCI cotton. The Pure Earth by STORMTECH collection includes products made from Recycled Polyester (RPET) and certified BCI Cotton. By turning discarded plastics into Polyester and committing to sustainably sourced cotton, STORMTECH is reducing the waste and environmental impact associated with apparel production.

RECYCLED POLYESTER

- The Pure Earth Collection uses Polyester regenerated from PET plastic found in landfills and oceans. The fabrics are certified recycled materials by a GRS (Global Recycle Standard) Certificate.
- These new sustainable products give materials a second life. Using recycled polyester also reduces plastic waste and stops it from ending up in landfills.
- As climate concerns continue to grow, environmental sustainability has been at the forefront of our product design principles. Sourcing recycled fibers will lower the carbon footprint of STORMTECH products.

CERTIFIED BCI COTTON

- The Better Cotton Initiative (BCI) is a global not-for-profit organization and a cotton sustainability program. It aims to make cotton production more sustainable by intending to minimize the negative impact of fertilizers and pesticides, and care for water, soil health, and natural habitats.
- BCI Cotton promotes better working conditions for farmers and farm workers concerning health and safety, freedom of association, child labour, forced labour, and non-discrimination. BCI Cotton is traceable to farm/field level.
- Through BCI and its Partners, farmers receive training on how to use water efficiently, care for the health of the soil and natural habitats, reduce use of the most harmful chemicals, and apply decent work principles.

BE CLIMATE SMART - INTRODUCING **POLYGIENE STAYS FRESH®**

Polygiene®
STAYS FRESH

Wear More. Wash Less. Recycled materials, safer chemicals, and lifecycle analysis are just a few examples of the steps apparel brands are taking to understand and reduce their impacts on the environment. While these efforts are important, consumers can do even more to reduce the environmental impact of apparel simply by washing clothes less frequently. Polygiene technology enables this by controlling odor in textiles. If we all Wash Less, we reduce our carbon footprint, extend the life of our clothing and save energy, water, time and money.
